NOTICE OF LEAD IN WATER HAZARD

Dear _____ (*Parent /Guardian*):

Recent water testing at Fairview Child and Family Center located at 125 Lawndale Avenue Hillsborough, NC 27278 revealed the presence of lead in water that is in excess of the acceptable levels set forth in N.C.G. S. § 130A-131.9C. Lead poisoning can cause learning difficulties, behavioral problems, and other adverse health consequences. Families & Communities Rising, Inc., has been notified of the lead hazard identified and recommendations have been made regarding the protection of the children from exposure.

Since your child may have been exposed, the Department recommends that your child be tested to determine his/her blood lead level on or before June 25, 2021. A simple test to determine your child's blood lead level is available through your regular doctor or at this Department. If you would like to bring your child to the Health Department for testing, please call Orange County Health Department at 919-245-2400 to make arrangements.

Questions about this Notice should be directed to me at the address listed above.

Sincerely,

Deric J. Boston
Director
Authorized Agent
